

# Delta Performance Products

*Bringing order to complexity, one color at a time*

## Corporate Overview

Delta Performance Products is a Covington, GA based contract manufacturer and supplier of high-quality color solutions serving the building materials industry. DPP offers color solutions in industries ranging from pool plaster to resinous flooring systems. With over 20 years of experience, DPP delivers consistency, precision, and performance through advanced color blending and technical expertise.

DPP offers turn-key powder and liquid private label manufacturing and raw material sourcing solutions. DPP's Outsourced Color program allows manufacturers to remove difficult to handle colorants from their plant and find a partner that can support color and product R&D, custom color blending/matching, and color pack production at scale.

## Why Delta Performance Products?

- Two production sites totaling nearly 80,000 sq. ft of production space in Georgia and Ohio
- Full powder and liquid blending and formulation production lines
- Packaging options ranging from 100g bags to totes and drums
- Two full service color labs with decades of R&D and color chemistry experience
- Low MOQs
- No stock colors customers are required to pick from
- Multiple powder and liquid blending and formulation production lines
- Packaging options ranging from 100g bags to totes and drums
- Two full service color labs with decades of R&D and color chemistry experience
- No stock colors customers are required to pick from
- Water soluble packaging expertise

## How We Serve The Flooring Industry

Delta Performance Products works closely with leading manufacturers across the floor coating industry to deliver high-performing, durable color solutions. DPP develops formulations engineered to perform in all major resinous and cementitious systems, providing customers with reliable, vibrant, and application-specific color performance.

DPP is currently in production for color packs across a full range of resinous chemistries, including:

- Epoxy: 100% solids, metallic/pearlescent effects, and solid color systems
- Polyurethane
- PU Cement
- MMA
- Polyaspartic
- Resinous Terrazo

In addition, DPP has developed powder and liquid color solutions for cementitious systems, serving the rapidly expanding polishable topping and overlayment market. This expertise allows DPP to meet the technical demands of industrial, commercial, and decorative flooring applications with precision, durability, and consistency.
