COLOR

Integra Integral Color is a concentrated liquid color dispersion that delivers vibrant, consistent color at every pour. Each pre-measured bottle is easy to use, VOC-compliant, and formulated for clean, hassle-free mixing. Every single shipment of Integra is made fresh to order - even in custom colors!

Available in 20 standard colors and infinite custom shades, Integra is compatible with all major self-leveling polishable overlay systems, including Rapid Set®, Ardex®, Mapei®, SpecChem®, and many others.

For added convenience, Integra offers bottle sizes to match batch sizes ranging from 1 to 5 bags, ensuring the perfect dose for any project—big or small. Engineered for uniform color, UV resistance, and long-term performance, Integra brings precision and reliability to every floor you create.

Color samples are guides only. DPP LLC does not warrant color matching to a color chart or to any color guide produced. Actual shade and texture will depend on job site conditions, lighting, installation technique, dye concentration, and types of concrete used. Verify actual appearance and compatibility with a test area before installing. No claims for color shade variation will be honored.
